ASAD ABBAS

Software Engineer | Graduate | Open to junior opportunities

Karachi, Pakistan | asadabbasbusiness@gmail.com

Portfolio | GitHub: asadabbas717 | LinkedIn: asadabbas717

PROFILE

Software Engineering graduate building Python developer tools, desktop business applications and full-stack/mobile software. Practical experience with transaction design, data recovery, automated testing and software releases through independent projects and internships.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Java
Applications: React, React Native/Expo, PySide6/Qt, Django, Supabase
Data and delivery: PostgreSQL, SQLite, Git, GitHub Actions, pytest, Vitest, Playwright, Ruff, mypy, Windows packaging

SOFTWARE DEVELOPMENT EXPERIENCE

Independent Software Developer - Qashoryx | June 2026 - Present

- Gathered shop-owner requirements and deployed offline business software for a client in Ranipur. Continue implementing changes and resolving defects across invoices, inventory, payments and customer accounts.

SELECTED ENGINEERING PROJECTS

RepoLens | Python developer tool | Public source

- Designed and published repolens-engineering on PyPI: deterministic Python repository analysis with evidence-backed findings and console, JSON and HTML reports.
- Separated acquisition, typed analyzers, scoring and reporting; added Windows/Linux CI and OIDC package publishing. Analysis reads target code without executing it.

Vendiqo | Offline Windows retail software | Case study

- Built inventory, purchases, sales, credit/collections and referenced returns using Python, Qt and SQLite, with atomic posting, balance snapshots and guarded backup recovery.

Loopnest | React Native / Supabase messaging | Public source

- Built invitation-based conversations, Realtime messaging and private photo sharing with participant authorization, retention rules and account deletion.

InternLog PK | Offline web application | Live app

- Shipped a React/TypeScript logbook with IndexedDB persistence, exact working-time totals, printable weekly reports and validated JSON backup replacement.

Cineyra | React / TypeScript / PostgreSQL | Case study

- Built film/TV discovery with deterministic ranking and optional AI reasoning, server-side integrations, account isolation and transactional preference reconciliation.

INTERNSHIP EXPERIENCE

Kaizen Hive - Web Development Intern
Completed HTML/CSS/JavaScript assignments covering DOM interactions, forms and responsive layouts, with introductory Node.js/Express work.

Internee.pk - React Native Intern | Virtual, two months
Built Expo assignment prototypes for local profiles/QR sharing, a demo-data dashboard with PDF export and locally persisted lesson progress.

Developers Hub Corporation - Android Development Intern | Remote | 10 June - 26 July 2025
Developed Java/Firebase social-app screens and data flows using Android activities, fragments and adapters.

EDUCATION

BS Software Engineering | University of Management and Technology (UMT), Lahore | Graduated July 2025
